

The section between the cities Siatista and Kastoria with a length of 47 km on a mountainous terrain is part of the Rail Line Siatista-Ieropigi (Albania borders), as it is described in the INTERREG IPA II CROSS-BORDER COOPERATION PROGRAMME «GREECE - ALBANIA 2014-2020» and is to be included in the TEN-T Railway Network.

[Systas](#) (as a 50% partner of the design consultancy J/V) developed the project Option Selection and Client requirements, the Preliminary Design and the Final detailed Design of the project (track alignment for design speed 160km/hr, 5 Railway stations track geometry, hydraulic works, structural design of bridges and tunnels, road network layout and detailed design, traffic maintenance issues during construction etc).

Project:

**OPTION SELECTION
PRELIMINARY AND FINAL
DESIGN OF THE NEW RAILWAY
LINE FROM SIATISTA TO
KASTORIA**
