

[SEETO Road Route 4](#) in Montenegro covers about 170 km from Bar to the Serbian border and its construction will connect the Port of Bar with Corridor 10 in Serbia, extending to Romania and Hungary. This 170 km of Route 4 also forms part of European Road Number E65 from Malmo in Sweden to Chania in Greece.

For the Government of Montenegro this project is a priority infrastructure investment that will stimulate the economic growth of Montenegro and will improve reliability and safety of road travel.

Systas, as a member of a design Consortium carried out the Optimized alignment alternatives for the concept design, existing road safety audits, highway hydraulic and pavement design at the feasibility design level and contributed to the Recommended Route Investment Plan.
