Systas (2017) contributed the most in identifying and evaluating alignment alternatives for the northern postponed part of the Central Greece Motorway E65.

From 2021 up to 2025http://www.systas.gr/ Systas has produced all the necessary final designs for the implementation of the 34 km of the above northern part of E65. These include Final Highway and Intersections design, Hydraulic and flood protection designs, Sign and Safety design, Toll stations arrangement design, Local roads restoration and connections, Traffic maintenance during construction designs and Culverts structural designs.

.
